

Instructional Placard provides at-a-glance exercises. QR code and URL provides smart phone links to exercise videos.

Incline Release Lever to move between seven levels of resistance.

JumpOMeter allows quick visual measurement progression of plyometrics.

Curved Platform follows anatomic curve of hip to foot ratio ensuring proper biomechanics throughout plyometric movements.

Slide Distance Regulator to control range of motion.

Safety Lock enables users begin exercise in a safe and comfortable position.

Variable Band Resistance (VBR) allows for an additional 10-70 lbs of resistance.

Anchor Feet with Bolt Holes for safety and stability.

PRODUCT SPECIFICATIONS

IN USE	104" x 33" x 68" [L/W/H] (2.6 m X .8 m X 1.7 m)
FLOOR SPACE	24 square feet (2.2 square meters)
UNIT WEIGHT	230 lbs [105 kg]
CONSTRUCTION	Steel with steel reinforced extruded aluminum rails
INSTALLATION	Designed to be bolted to the floor
CAPACITY	Maximum user weight capacity of 400 lbs [180 kg]
BODYWEIGHT RESISTANCE	50% - 80% BWR
BANDS	Additional 10 – 70 lbs VBR
WARRANTY	Frame: 5 years Upholstery: 90 days Rubber & Moving Parts: 1 year

The ELEVATE Jump™ builds explosive power and develops lower body muscle mass with two primary movements, the squat and the squat jump. Uniquely designed to facilitate plyometric exercises leveraging both linear bodyweight resistance and band variable resistance, the Jump produces both concentric and eccentric loading of the muscles – allowing users to accelerate and decelerate quickly during a squat jump in a safe, controlled manner. Able to accommodate all levels of fitness, the ELEVATE Jump supports the spine during traditional squat exercises so that users can comfortably control the descending and ascending phases of the squat, while providing an opportunity for advanced variations including single-leg squats and staggered stance squats.

1. Provides concentric and eccentric force utilizing both linear bodyweight resistance (BWR) and variable band resistance (VBR).
2. Four resistance bands can be engaged to allow for an additional 10-70 lbs resistance in 10 lb increments.
3. Pneumatic brake protects joints during plyometric movements.
4. Angled glideboard provides comfort and support for the upper body.
5. Includes link to exercise library with additional and advanced exercise options.
